

Hunter ALPHA and OMEGA 4G Trail Camera

Quick start

English

hunter®

Step 1 – Add camera to app account

1. Download and install App on your phone by scanning App QR code to the right or by searching **HunterCam** in App Store / Google Play.

Hunter Cam
Sport

2. Please use a valid e-mail address to register, then activate the account through the e-mail you received from **trailcam@wuyuantech.net** and log in.

*Note! The activation mail might be in your **spam mail**.*

*Note! Some phones automatically adds a **space after words**.*

3. Install camera antenna/s, SIM card, SD card (up to 32 GB) and 8/12 pcs of AA batteries.

Note! SD card and batteries are not included.

Note! Camera is delivered with Hunter SIM Card.

4. Switch Power Button on camera to **SETUP** position, wait about 30 seconds. Then enter **Menu>Other>QR-code** to get camera unique QR code.

5. Click **Add Camera>Next** in App, scan the camera QR code, name the camera and locate the camera to add camera to your App account.

- ➔ For Hunter SIM users, please follow step 2.1.
- ➔ For Other brand SIM card users, please follow step 2.2.

Step 2.1 – Choose data plan (only for Hunter SIM users)

1. Exit App to Camera screen, click  to the right to enter camera Setting List page. Choose refill to top up your account with Coins  (please see separate Hunter Cloud Camera payment instruction on page 7 in this Quick start guide for detailed information regarding payment). You can either pay directly from App or from website <https://pay.wuyuantech.com/WuYuan> If you buy from App click Buy Now and add Hunter Coins.

Note! You will receive a top up notification by e-mail.

Step 2.2 – Get credits (only for other brand SIM users)

1. Every new camera comes with 1 Hunter Coin 🪙 that can be changed to 1000 free credits which you can find in **APP>Account**.
2. Click Add Credits to change Coins to Credits.
1 Coin = 1,000 credits.
3. Camera will connect automatically to 4G network after SIM card is inserted.

*Note! SIM card must be topped up with **data**.*

If **SIM Automatch failed**, please enter **setups manually** pops up on screen, go to **SETUP>MENU>Cam>4G Setup>Manual** and fill in your SIM card operators 4G APN, Username and Password.

Note! It's not a must to enter Username and Password of APN, but some operators may require this password access to get connection to their 4G network. Please reach out to your operator to get this confirmed.

Step 3 – Start using your camera

1. Turn off the camera, then switch power button to **Setup** position and then wait until the next **Server Synk** disappears and the text **Transmission OK** appears (approx 30 sec). Then the screen shows 4G signal bar(s).
2. Press button **OK** to take photo, wait for about 30 seconds. This photo will be sent to your app.
3. Switch power button to **On** position, camera indicator light will flash five times before it enters auto work mode.

Test and start using your camera!

Hunter Cloud Camera Payment

SIM card

1. You can use your own SIM card or Hunter SIM card (recommended).
2. With your own SIM card you pay for cloud storage with Credits. The pictures are saved in the Cloud for 30 days.
3. With Hunter SIM you choose a monthly data plan and pay with with Hunter Coins. Both cloud storage and data for the camera to send pictures are included in the monthly data plan. The pictures are saved in the Cloud for six months.

Coins and Credits

You use Coins as currency to pay in the HunterCAM app. Minimum purchase is 10 Coins.

1 Credit = 1 Thumbnail

1 Coin  = 1000 Credits

For approximate data consumption using Cloud, visit www.hunterworld.se
